

## PROFESSIONAL PARRILLA

### FEATURES | BENEFITS

#### PROFESSIONAL PARRILLA : SINGLE MODULE

Professional BBQ Argentine Grill is composed of a single module (grill and fire lighter together).

#### PARRILLA : CUSTOMIZED BY MODULES

Professional BBQ Argentine Parrilla Grill with independent fire box.

#### THERMAL INSULATION

The heat is retained in the fire box with our proprietary insulation generating charcoal savings compared to conventional masonry equipment. The included fire box doors keep the operator cool.

#### MANUAL GRILL OPERATION

Manual up/down elevation of grills through the front wheel. Front wheel with anti-reverse technology, this allows independent front wheels, without mixing the different grill types.

#### READY TO USE

No masonry construction required.

#### HIGH QUALITY

Equipment designed and built with premium quality to provide the best barbecue performance and greater durability in professional use.

#### GRILLS OPTIONS

Standard with V shaped Grills made of carbon steel. Upper rest grill for vegetable and meats. Options in Stainless Steel V-shape, Stainless Steel or carbon round bars.

#### CLEANING

Equipment coated in brushed stainless steel 304 or 430 stainless steel with castors to displacement and removable grills that facilitates the operation and cleaning.

### TABLE SIZE

Measure B	Drive wheels	Measure C	Cooking Area Length (mm)	Depth (mm)	Height (mm)
800	1	500 600 700 800	620 x 825	955	1730 + 170 (drive wheel)
1000	2		345 x 825		
1200	2		445 x 825		
1500	2		595 x 825		
1800	2		745 x 825		
2000	3		510 x 825		
2300	3		660 x 825		

The overall length of this equipment is 2.800 mm.

## INFORMATION

### FIRE BOX HEIGHT

Standard brick height up to grill: 8" . If you need another height , request this at time of quotation.

### ELECTRICITY

This machine does not require electrical installation. 100% manual activation.

### EXHAUSTION

Equipment requires the installation of an exhaust fan to remove smoke. Check your local fire specification and health regulations. Ventilation calculations need to be confirmed by a mechanical ventilation specialist, local consultant or contractor to ensure that the system meets local specifications.
