

PROFESSIONAL Santa Maria Grill

FEATURES | BENEFITS

SINGLE MODULE

Professional Santa Maria Grill

THERMAL INSULATION

The heat is kept in the fire pit of the barbecue, generating coal savings compared to conventional masonry equipment.

MANUAL GRILL OPERATION

Manual lifting using the side wheel.

HIGH QUALITY

Equipment designed and built with high quality to provide the best barbecue performance and greater durability in professional use.

READY TO USE

No masonry construction required.

GRILLS OPTIONS

Standard with V shaped Grills made of carbon steel. Options in Stainless Steel V-shape, Stainless Steel U Shape, Stainless Steel round bars, carbon steel round bars and Flat Shape or partial style grills.

CLEANING

Equipment coated in brushed stainless steel 304 or 430 stainless steel with castors to move the barbecue and removable grills that facilitates the operation and cleaning.

Parrilla Overalllength "A" (mm)	Cooking Area Length (mm)	Firelighter Overalllength "B" (mm)	Depth (mm)	Height (mm)
600+80 (wheel)	400 x 810	500 600 700 800	1000	1610 + 170 (wheel)
800+80 (wheel)	600 x 810			
1000+80 (wheel)	800 x 810			
1200+80 (wheel)	1000 x 810			
1500+80 (wheel)	1300 x 810			

INFORMATION

FIRE BOX HEIGHT

Standard brick height up to grill: 200mm . If you need another measure, request the feasibility of changing the project.

ELECTRICITY

This machine does not require electrical installation. 100% manual activation.

EXHAUSTION

Equipment requires the installation of an exhaust fan to eliminate smoke. Check your local fire specifications and health regulations. Ventilation calculations need to be confirmed by a mechanical ventilation specialist, local consultant or contractor to ensure that the system meets local specifications.

OPTIONAL ITEMS

- Fixed/Movable Front counter with or without GN Tray gaps.
- Ash Drawer: Possible only if there is NO Brazier included.
- Steel Type: Available in stainless steel 304 and 430 (up to the threshold). The part below the threshold is produced in black version.
